

For Immediate Release:

GeckoSystems Enables More Graceful Mobile Robots

ATLANTA, GA, Mar. 13, 2008 (MARKET WIRE via COMTEX) -- GeckoSystems Intl. Corp. (PINKSHEETS: GCKO) announced today that they have further improved mobile robot performance, while holding costs constant, with the introduction of their GeckoMotorController™ 6.0. GeckoSystems is a dynamic leader in the emerging Mobile Service Robot industry revolutionizing their development and usage with *mobile robot solutions for safety, security, and service.*™

The new GeckoMotorController uses a proprietary “constant energy” paradigm for extraordinarily smooth acceleration and de-acceleration of mobile service robots. “A ‘herky jerky’ mobile robot platform can be very distracting when proximate to people and other living things. We are very pleased with the ‘ballerina grace’ that is now a part of our many advanced mobile robot solutions. This friendlier, smoother movement of our mobile robots will further speed the adoption of them by the consumer, professional healthcare, and commercial/homeland security marketplaces; while increasing ROI for our investors,” concluded R. Martin Spencer, President/CEO.

The GeckoMotorController is written in C, uses quadrature encoded PWM and runs on the locomotion CPU that is a subsystem on the GeckoSPIO™.

About GeckoSystems International Corporation:

In the ten years since founding, the Company has developed a suite of proprietary, fundamental technologies that enable their robots to automatically self-navigate the home or workplace using advanced sense and avoid technologies for reliable, unattended collision avoidance while patrolling, following, and/or seeking preset destinations. Their scientifically developed, tested, and proven hardware and software breakthroughs enable the practical, low cost manufacture, sale and usage of mobile service robots in a variety of environments.

Safe Harbor:

Statements regarding financial matters in this press release other than historical facts are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934, and as that term is defined in the Private Securities Litigation Reform Act of 1995. The Company intends that such statements about the Company's future expectations, including future revenues and earnings, technology efficacy and all other forward-looking statements be subject to the Safe Harbors created thereby. The Company is a development stage firm that continues to be dependent upon outside capital to sustain its existence. Since these statements (future operational results and sales) involve risks and uncertainties and are subject to change at any time, the Company's actual results may differ materially from expected results.
