

For Immediate Release:

Major Chinese Robot Mfg. Seeks Discussions with U.S. Mobile Robot Co.

CONYERS, GA, March 26, 2009 /PRNewswire-FirstCall via COMTEX/-- GeckoSystems Intl. Corp. (PINKSHEETS: GCKO) announced today that a major, multi-million dollar Chinese robot manufacturer has extended an important invitation to GeckoSystems to meet with their senior management at their corporate headquarters in Eastern China.

Martin Spencer, President/CEO of GeckoSystems stated: "As all of us here at GeckoSystems are excited about this development, due to the nature of the upcoming discussions I feel it is in the best interest of all parties involved to withhold the name of the Chinese company at this time. The upcoming meeting and the potential outcome(s) of it is something that has been in the works for several years and is now coming to what looks to be an extraordinarily profitable culmination. I believe their interest in us is due to not only our flagship product, the automatic self navigation software, GeckoNav(tm), but also the reality that we have a complete multitasking personal robot, the CareBot(tm), with verbal interaction capabilities, GeckoChat(tm), and the ability to routinely follow a designated family member with GeckoTrak(tm)."

The Chinese have their own eldercare crisis due to their adult children with elderly parents working in the industrialized cities. Since they have at least 20,000,000 elderly living in these eldercare facilities, the cost benefits of GeckoSystems' suite of mobile robot technologies will generate multiple revenue streams for GeckoSystems in the form of licensing, royalties, training, and sales of various hardware systems and subsystems.

"During our upcoming discussions we will be making strategic decisions as to what they will be licensing and/or purchasing from us and what we will be purchasing from them and/or their qualified suppliers. We expect the synergies in our cooperation to result in distribution into the Chinese market and significant cost reductions in the systems and subsystems we will be importing from China. As one would expect, a more competitive cost structure will enable a better ROI for our stockholders," concluded Martin Spencer.

The GeckoSystems' business model is very much like that of an automobile manufacturer. Due to the final assembly, test, and shipping being done based on geographic and logistical realities, each business relationship can range from private labeling to joint manufacture and distribute to licensing only.

About GeckoSystems International Corporation:

The Company's mobile robot solutions are appropriate for the consumer, professional healthcare, commercial security and defense markets. The consumer has needs for family care assistance with remote monitoring and notification. This is for family care for the elderly, chronically ill, and children. Professional healthcare needs cost effective errand running, portable telemedicine, etc., enabling specialist nurses to be more efficient and productive with less work. Homeland Security needs cost effective mobile robots patrolling public venues with WMD, small arms weapon detect, etc. Commercial and military users desire the elimination of the "man in the loop" to enable unmanned ground and air vehicles to not require constant human control.

Safe Harbor:

Statements regarding financial matters in this press release other than historical facts are "forward-

looking statements" within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934, and as that term is defined in the Private Securities Litigation Reform Act of 1995. The Company intends that such statements about the Company's future expectations, including future revenues and earnings, technology efficacy and all other forward-looking statements be subject to the Safe Harbors created thereby. The Company is a development stage firm that continues to be dependent upon outside capital to sustain its existence. Since these statements (future operational results and sales) involve risks and uncertainties and are subject to change at any time, the Company's actual results may differ materially from expected results.
